

Accessing a Course as a Guest

You must be logged into Blackboard in order to access the course(s). Once logged into Blackboard, Choose the **Courses** Tab.

If you know the name of the course, try and enter it in the **Course Search Box**. (This is the easiest and most direct method.)

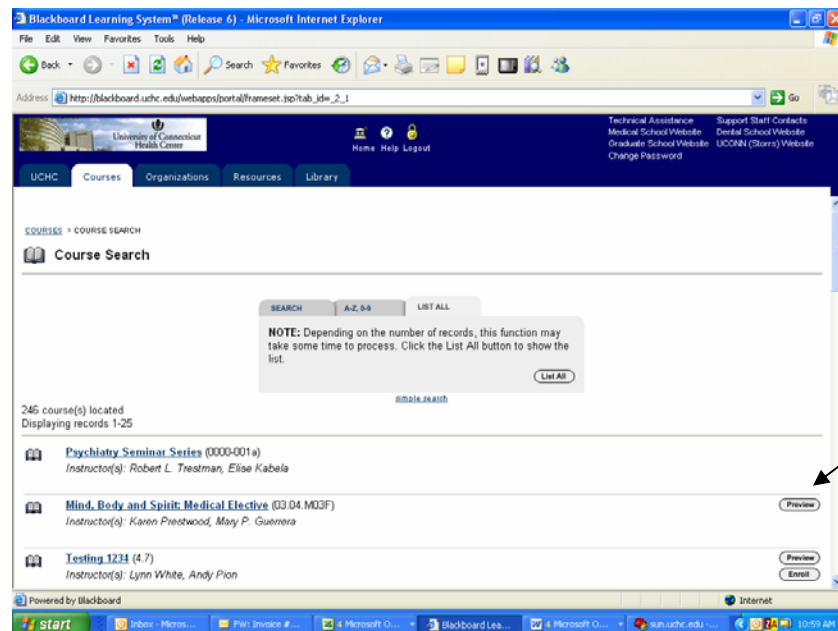

You can use the **Advanced Search** function as well. This will allow you to search by course id, user name, or description of the course.

Blackboard Support Center

Blackboard 7 Learning System QuickSheet • Faculty Instructional Technology Services • <http://fits.uchc.edu> • 860-679-2573

Note that if you see the **Preview** button next then you can access that course as a guest. If there is no **Preview** button, then guest access has not been turned on for that course. As it lists the faculty/instructors in the course you may contact them and see if they will turn guest access on.

Once you find the course you are looking for you can enter it by choosing either the link for the course name, or the **Preview** button. Once in the course you will have access to any features that the instructor has turned on for guest access.
