

Blackboard: Adding A File To The Content System

1. Logon to Blackboard
2. Click the Content System tab
3. Select the appropriate section of the Content System
4. Click the Upload button
5. Click Upload Files

6. Select Single File or Multiple Files
7. Click the Browse button

8. Select the files you want to Upload

9. Click Open

10. Your files should now appear in the upload list

Note: If you want to add more files you can click the Browse button again. If you want to remove a single file you may click the blue X in the “Remove” column. If you’d like to remove all files you may click the “Remove All” button.

Browse

Remove All

Name	Size	Remove
bbcc01.png	134.0 KB	
bbcc02.png	138.0 KB	

11. Select any options you desire

12. Click Submit

Select Options

☐ Lock File

An item can be unlocked only by the person who locked it. Locking an item prevents other users from editing it and precludes overwriting and versioning.

☐ Share Comments

If Comments are Shared, users with Read permission may view and add Comments.

☐ Enable Versioning

If Versioning is enabled, overwriting or editing a file will create a new Version.

☐ Enable Tracking

If Tracking is enabled, each instance that a user interacts with an item is recorded.

13. Your files should now appear in the content system

Success: Items added.
