

Happy or unhappy with your help around the house or in the community*

Do you like where you live?*

MFP
Quality of Life
Dashboard
As of 9/30/2017

Happy or unhappy with the way you live your life*

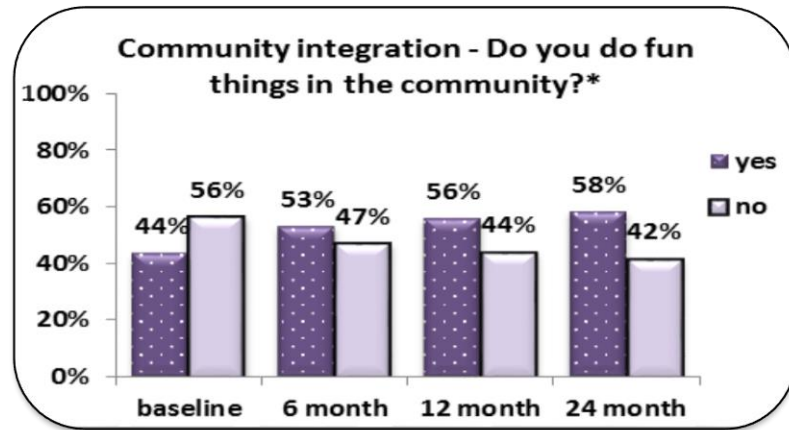

Do the people who help you treat you the way you want them to?*

Depressive Symptoms*

Note: Percentages may not sum to exactly 100% due to rounding

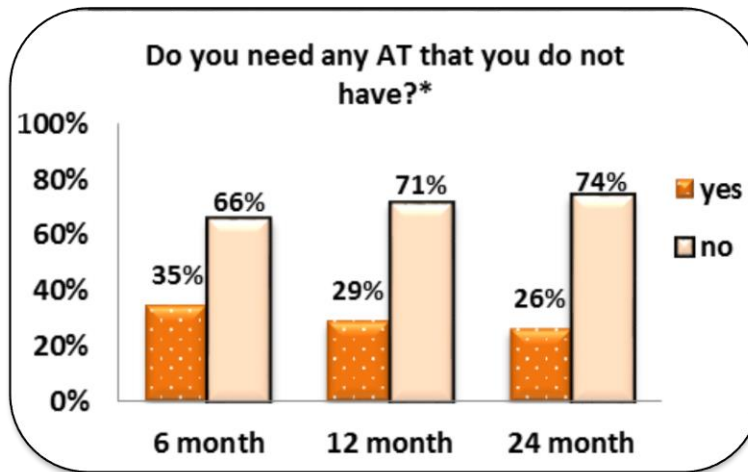

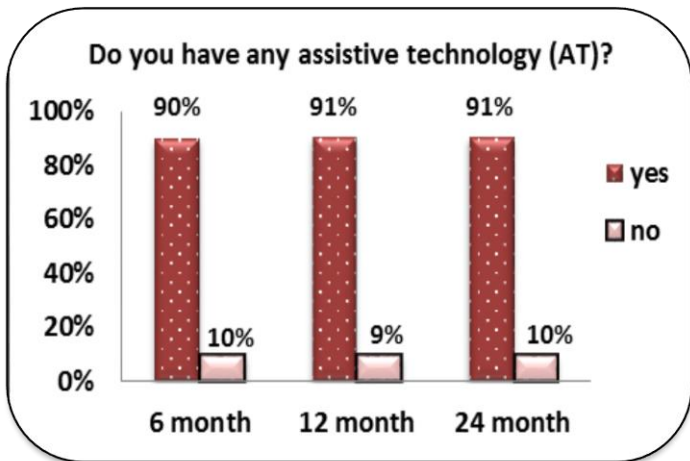

Cumulative data through 09/30/2017

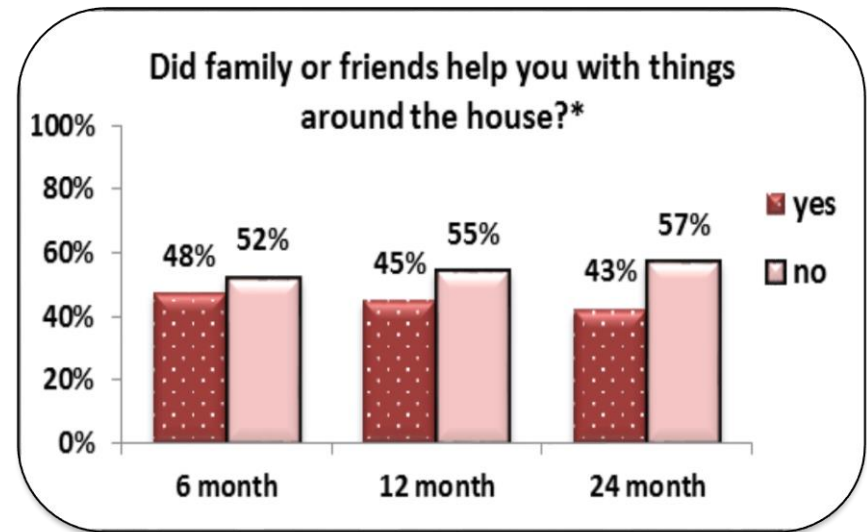

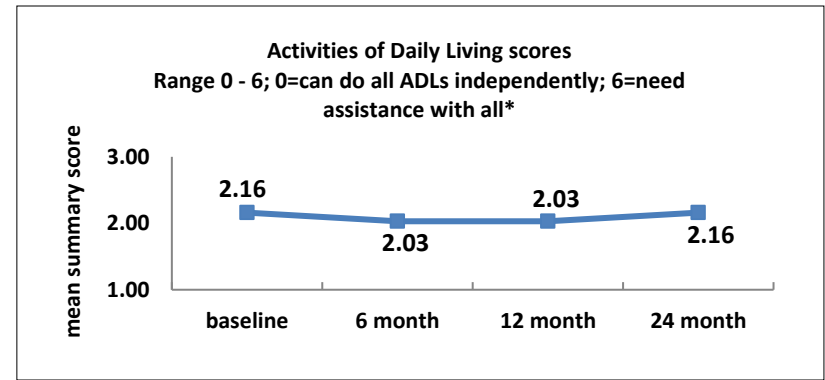

Baseline interview is done prior to transition; n=4742

6 month interview is done 6 months after transition; n=3613

12 month interview is done 12 months after transition; n=3207

24 month interview is done 24 months after transition; n=2263

UConn Health, Center on Aging
 Quality of Life interviews from 12/1/08 - 09/30/2017

Connecticut's Money Follows the Person (MFP) Quality of Life Dashboard **UConn Health, Center on Aging**

The MFP evaluators at the UConn Health's Center on Aging produce the Quality of Life (QoL) Dashboard every quarter. The Dashboard includes cumulative data for nine domains composed of 15 questions or scales from the QoL Survey. Sixty-two questions compose the full QoL survey which all MFP participants complete before transition (baseline) and at 6, 12, and 24 months after transition. An asterisk (*) indicates items with statistically significant differences across the four survey times.

Domains and QoL survey questions:

Health and well-being

- Overall health - subjective rating (*excellent, good, fair or poor*)
- Activities of Daily Living (ADLs) – range from 0 to 6; 0 = no ADL impairments
- Instrumental Activities of Daily Living (IADLs) – range from 0 to 7; 0 = no IADL impairments
- Depressive symptoms: “During the past week have you felt sad or blue?” and “During the past week have you felt irritable” (*yes to either or both questions*).

Assistive technology (AT) use and unmet need (asked after transition only)

- “Do you have any assistive technology?” (*yes/no*)
- “Do you need any assistive technology that you do not have?” (from a list of 9 AT devices or modifications; or respondents can name other AT not on the list)

Access to health care (unmet need)

- “Is there any medical care, such as a medical treatment or doctor’s visits, which you have not received or could not get to within the past month?” (*yes/no*)

Access to personal care (unmet need)

Participants report if care ever does **not** occur specifically due to lack of assistance, in four areas: going without a bath or shower, going without a meal, going without taking medications, and not being unable to use the bathroom when needed. Scores range from 0 unmet care needs to 4 unmet care needs.

Choice and control

This scale summarizes six areas; scores range from 0, no choice and control on any of the six items, to 6, choice and control on all six items: going to bed whenever you want, being by yourself when you want, eating whenever you want, choosing the foods that you eat, talking on the telephone without someone listening, and watching TV whenever you want. Comparisons over time examine the average number of areas of choice and control.

Respect and dignity

- For people who are receiving help for personal care activities, the question is “Do the people who help you treat you the way you want them to?” (*yes/no*)

Community integration and inclusion

- “Do you go out to do fun things in your community?” (*yes/no*)

Satisfaction with services and Informal assistance

- “Taking everything into consideration, during the past week have you been *happy or unhappy* with the help you get with things around the house or getting around your community?”
- “During the last week, did any family member or friends help you with things around the house?” (asked after transition only) (*yes/no*)

Global Quality of Life

- “Do you like where you live?” (*yes, no or sometimes*)
- “Taking everything into consideration, during the past week have you been *happy or unhappy* with the way you live your life?”
