

REDCap How to Enable Survey Notifications

Survey notifications can be used if you or other users wish to be notified via email every time a participant completes a survey. Please note: The notification email message you receive from REDCap is hardcoded and cannot be changed.

To activate Survey Notifications, navigate to Online Designer and click the Survey Notifications icon that is located above your data collection instruments.

Instrument name	Fields	View PDF	Enabled as survey
My First Survey	4		
My Second Survey	0		
My Third Survey	0		

Use the drop down underneath the “Recipient Email Address” column and select each user who would like to be notified for each specific survey. Once you have selected an email address, the Notifications Enabled icon will turn green.

If you would like to remove a user as a recipient for the survey notifications, change their email drop-down option to 'not selected', after which they will no longer receive notification emails for that survey.

Email notifications for survey responses ✕

If you or other users wish to be notified via email every time a participant completes a survey, select the users to be notified under each survey listed below by selecting their email address in the user's drop-down list, which may contain each user's primary, secondary, or tertiary email address for their REDCap account. To remove a user as a recipient for the survey notifications, change their email drop-down option to 'not selected', after which they will no longer receive notification emails for that survey.
