

# UConn Health is now recruiting Health Care workers for a research study Involving COVID-19 Serological Testing.

Any UConn Health employee that **has tested positive for COVID-19 virus** will be asked to donate 1-3 teaspoons of blood to check for antibodies.

**Participation is voluntary and strictly confidential.**

**Participation in this study requires several visits and involves blood draws. The time for each study visit will be about 20 minutes.**

Study is being conducted by  
Dr. Bruce Liang, MD  
Calhoun Cardiology Center
