Battelle CCDS™ Process

HOW IT WORKS
Battelle CCDS Critical Care Decontamination System™

**Your Facility’s Responsibility**
- Your Battelle POC will provide you with 3-digit codes for each facility
- The 3-digit code must be written on each individual N95
- Collect all N95 respirators into a single plastic bag
- Once the plastic bag is filled, tie off the bag and put it into another plastic bag
- Clean the outside bag with disinfectant
- Shipping box must be labeled with the 3-digit code and a biohazard sticker
- You can either use a logistics provider of your choice or Battelle’s preferred logistics provider

**Battelle CCDS™ Process**
- Your shipments are barcoded to ensure chain of custody
- Your N95 respirators are exposed to the vapor phase hydrogen peroxide process
- After processing, your N95 respirators are verified to ensure they are free of decontaminant
- The logistics provider returns your decontaminated N95 respirators back to your facility
