COVID-19 Symptoms
The standard symptoms of COVID-19 include fever, dry cough and shortness of breath. Dyspnea is most associated with severe COVID-19.
The Centers for Disease Control has added six new symptoms for clinicians to watch for as possible indicators of COVID-19. They include: chills, repeated shaking with chills, muscle pain, headache, sore throat, new loss of taste or smell. The loss of taste or smell is often an early and strong indicator of the presence of COVID-19 infection.
Other possible symptoms include confusion, nausea, abdominal pain and diarrhea. There have also been reports of stroke and inflamed toes associated with COVID-19.
We are still in the early days of this epidemic and we are learning more and more about the disease. It is very important that you protect yourself and maintain a high degree of suspicion for the presence of COVID-19. Place a mask on your patients and please wear your proper PPE.
Stay safe out there. You are needed.

STEMI and COVID-19
We have modified our STEMI procedures during the pandemic. EMS will continue to call STEMI ALERTS from the field. Instead of being brought directly to the cath lab on the EMS stretcher, all patients will receive a COVID screening and a detailed cardiology evaluation in the resuscitation room before going to the cardiac catheterization laboratory. Echocardiogram screening will be considered in appropriate patients before going to the cath lab, and thrombolytics may be considered as an option to PCI for certain patients. Making the safest and most clinically appropriate decision for each patient holds precedence over speed to the cath lab.
We appreciate all EMS does. Please continue to transmit your 12-ECGS and call in STEMI ALERTs with medical control as soon as possible and preferably before you leave the scene so our cardiac team can be ready to evaluate the patient immediately upon arrival through the hospital’s door.

Lunch Donations to EMS-Thank You!
Thank you to Toasted OAT Café of Canton and Forge City Works (The Kitchen) of Hartford for their recent generous donation of delicious sandwiches to hardworking area EMS crews during this pandemic. Your thoughtfulness is greatly appreciated. And your food was fantastic! From EMS providers to food preparers, what a great community we live in!
