

MEDICAL TREATMENT/PRESCRIPTION WRITING

Residents/fellows may provide treatment for patients they are caring for on their assigned rotations, both inpatient and outpatient. Such treatment may include but is not limited to providing direct clinical care, writing prescriptions, ordering tests or making referrals.

Connecticut requires several numbers before these privileges are available. Please refer to [National Provider Identifier \(NPI\) Number](#), [Connecticut Controlled Substance Number](#), [Provider Enrollment, Chain and Ownership System \(PECOS\)](#), [Connecticut Prescription Monitoring and Reporting System \(CPMRS\)](#), and [Drug Enforcement Administration \(DEA\) Number](#) for more information on what is required.

A resident/fellow who provides treatment for someone who is not under his/her care as part of the residency/fellowship program, is NOT covered by malpractice liability. This activity is prohibited. The resident/fellow who engages in this activity may be subject to disciplinary action.

Revised 3/16, 5/17, 4/19, 3/21
