

UConn HEALTH

Group on Women in Medicine and Science Luncheon Seminar

October 15, 2015 • 12:00-1:00 p.m. • Onyiuke Dining Room

Guest Speaker

Laurine M. Bow, PhD, HCLD (ABB)

Director, Transplant Immunology Laboratory

Assistant Professor of Surgery

Yale University School of Medicine

***“Transplant Immunology and Organ
Transplantation, Teamwork at Its Best”***

Laurine Bow received her PhD degree in Molecular Genetics and Cell Biology from the University of Connecticut in 1991. She has held faculty positions at the University of Connecticut, and is currently Assistant Professor of Surgery at Yale University School of Medicine, New Haven, CT. She is currently the Director of the Histocompatibility and Immune Evaluation Laboratory at Yale, and has also held this position at Montefiore Medical Center, Bronx, New York and Hartford Hospital in Hartford, CT. While at Hartford Hospital she held the position of Vice President for Research from 2007 to 2012, and has maintained directorship of the Transplant Immunology

Laboratory at that institution since 1991. Laurine has authored or co-authored over 35 publications in the field of organ transplantation, with particular focus on transplant immunology and histocompatibility, and has had many presentations at scientific meetings including ASHI, AST and the International Transplant Society (TTS). As several new assays involving antibody detection have recently been developed in the field, her key interest has been in evaluating how these data are best able to inform potential for organ transplant antibody mediated rejection, and improve outcomes for transplant recipients.

– A discussion to follow on balancing a successful academic work-life career. –
