HEALTH CAREER OPPORTUNITY PROGRAMS

Aetna Health Professions Partnership Initiative

Health Disparities Clinical Summer Research Fellowship Program

Dear Health Disparities Clinical Summer Research Fellowship Program Participants,

It is a pleasure to welcome you to the Aetna Health Professions Partnership Initiative (Aetna HPPI) sponsored by the Department of Health Career Opportunity Programs at UConn Health. The Aetna HPPI is a formal consortium offering a comprehensive program of educational enrichment and support activities for students of diverse backgrounds. This initiative, comprised of a pipeline of academic and research programs, continues to be instrumental in increasing the numbers of students from diverse backgrounds applying to and matriculating to medical or dental school, or graduate programs in the biomedical sciences. We appreciate the continued support of faculty and staff at UConn Health and at Central Connecticut State University who help to make these programs successful each year.

This handbook is designed to better acquaint you with the curriculum of the Health Disparities Clinical Summer Research Fellowship Program and the rules, expectations, and policies of the program, the Department of Health Career Opportunity Programs, and Central Connecticut State University. It is important that you review the materials included in this handbook in order to gain the full benefits of participating in this program. The faculty and staff of the Department of Health Career Opportunity Programs are available to assist you throughout your time in the program. It is our goal to provide a continuous mentoring and support system for students not only throughout the duration of the program but also throughout their academic and professional endeavors.

We hope that you will find the Health Disparities Clinical Summer Research Fellowship Program insightful and enriching as you continue on your path towards becoming a health professional. Through your participation in this summer enrichment program, you will be better prepared and equipped for future health careers.

We hope that you will find your summer with us a worthwhile experience. For more information about the Department of Health Career Opportunity Programs and the Aetna HPPI pipeline programs, please visit our website at health.uconn.edu/hcop/.

Sincerely,

Health Disparities Clinical Summer Research Fellowship Program

General Description

This program provides an introduction to health disparities, cross cultural issues, principles of clinical medicine and skills for public health research and interventions. An overview of approaches to cultural definitions, public health issues and discussion of specific techniques for working with diverse populations in community settings is offered. Teaching methods consist of didactic sessions, experiential learning and student presentations. Included in the orientation is a tour of Hartford and introduction to clinical skills. For the tour, students explore Hartford neighborhoods to learn more about the history of Hartford, health issues facing Hartford residents and resources available. For the clinical skills portion, students receive background literature to prepare for a class on this subject followed by a practice session where students attempt to elicit a history from trained patient instructors. Both the patient instructors and faculty debrief and offer students feedback following the exercise.

For the remainder of the program, students divide their week between shadowing a community physician and spending time in a community organization. Both experiences are designed to help the students learn more about health disparities and strategies for addressing these issues. While at the community organization, the students learn about the clients served, health matters facing the community and services provided. Students also conduct a research project on a topic designed in collaboration with the community organization. During the program, students are required to prepare an abstract of their research project. At the end of the program, students present their research at a poster session held at UConn Health. Students, faculty and community members are invited to the poster presentation.

Learning Objectives

- To become familiar with the demographic influences on health care quality and effectiveness in the diagnosis and treatment of disease at an individual and community level.
- To be able to define the terms frequently used in cultural competency.
- To become familiar with major areas of disparities that result in increased mortality and morbidity.
- To become familiar with research methods and implement them in a project.

All participants of the Health Disparities Clinical Summer Research Fellowship Program will present a poster of their summer research on Thursday, July 25, 2019. Information on the structure and dimensions of the poster will be provided. All posters must be approved by the research faculty mentor and the program directors before the final poster is printed. Posters will be printed through the Biomedical Media Communications (BMC) Department at UConn Health. Instructions on poster requirements and due dates will be provided. In addition to creating and presenting a research poster, participants are also required to write an abstract that summarizes their research, which will be included in an abstract booklet for the poster presentation on July 25th. All final abstracts must be approved by the research faculty mentor and the program directors. Instructions on abstract requirements and due dates will be provided.

Program Expectations & Professionalism

All participants are expected to dress in an appropriate and professional manner. Please adhere to the dress code at your community site and clinical sites. For clinical shadowing and working in the community during the week, you must dress appropriately. Females must wear skirts, dresses or nice pants, blouses/dressing shirts, and shoes; and males must wear nice slacks, dressing shirts, and shoes (ties are optional). No open toed shoes or sandals are allowed. The ID badge and lab coat (if applicable) should be worn and clearly visible for all clinical encounters. Please also bring comfortable clothing for weekends and weekly activities that do not require professional dress.

All participants are expected to participate in all program activities and conduct themselves in a professional manner at all times. All participants are expected to act responsibly and in the best interest of patients, visitors, faculty, students, and staff. Information about professionalism in medicine can be found on the School of Medicine website, <https://medicaleducation.uconn.edu/curriculum/m-d-curriculum/legacy-curriculum/> under Professionalism Competency.
