6. Then select English for the language package, and click Download

7. Click Download your file manually

**8.** Once the download completes, find the **Citrix Receiver.dmg** and double click it to open the installer.

The default location for downloads is the Downloads folder, unless you have specified a different location.

**9.** An icon, like the one below on the left, should appear on your desktop. Double click the **Uninstall Citrix Receiver** to remove any previous Citrix software.

**10.** Once the uninstall process is complete, double click the **Install Citrix Receiver.pkg** to install Citrix v11.8 client software.

**11.** Go to the Applications folder, drag the Citrix Receiver icon to the application dock on the bottom of your screen, if it not already there. Then launch the Citrix Receiver application.

12. It will ask you to enter your work email or server address.In the text field enter: <u>http://ctxwiscluster.uchc.edu</u> Then click Next.

13. When the logon screen appears do not enter any information yet, click cancel.

14. Click the little arrow to the left of the search bar and click Preferences...

15. Click on the Accounts Tab.

16. Click on the Gear symbol and then click Configure Account...
