

**DON'T GET HOOKED!**

## Phishing

Phishing is a form of social engineering. Attackers use email or malicious websites to collect personal and financial information.

- When in doubt, throw it out.
- Think before you act.
- Delete any request for financial information or passwords.
- Be wary of hyperlinks.

Think you received a phish? Forward it to the Service Desk at [servicedesk@uchc.edu](mailto:servicedesk@uchc.edu).
