

Physician-Scientist Career Development Colloquium

"On Being a Physician-Scientist"

Stephanie Eisenbarth MD, PhD

Associate Professor Laboratory Medicine & Immunobiology

Yale University School of Medicine

Dr. Eisenbarth is a pathologist and immunologist whose research focuses on how the innate branch of the immune system regulates adaptive immunity in several disease models such as allergy and alloimmunization.

More recently, she has focused on the function of dendritic cells and their migration. Dr. Eisenbarth has received numerous honors, including the Society of Leukocyte Biology's G. Jeanette Thorbecke Award for an outstanding early career female scientist and The American Society for Clinical Investigation Young Physician-Scientist Award.

DATE: Monday, April 9, 2018

TIME: 5:00 p.m.

LOCATION: EG013, UConn Health

An informal reception to follow the keynote address

Presented by the Office of Physician-Scientist Career Development
