

UConn HEALTH

POLICY NUMBER 2005-10
January 28, 2005

POLICY: UConn HEALTH HIPAA SECURITY VIRUS

PROTECTION POLICY PURPOSE:

UConn Health is committed to implementing formal procedures for guarding against, detecting, and reporting malicious software. Malicious software, means software, for example, a virus, designed to damage or disrupt a system.

SCOPE:

This policy applies to all UConn Health workforce:

- Employees (including faculty and staff)
- Volunteers
- Students and Residents
- Temporary Staff
- Agency and contracted staff
- Credentialed staff
- Members of the Board of Directors

POLICY STATEMENT:

1. This policy applies to all computer equipment connected to the UConn Health network.
2. The UConn Health Information Technology Department shall ensure anti-virus checking software is in place and up-to-date for all UConn Health systems to identify viruses, worms, Trojans, spyware, and other forms of malicious software. (Note: Due to industry terminology and widespread use of calling all malicious software a virus, “virus” refers to all malicious software in the context of countermeasure products.)
3. All computer equipment connected to the UConn Health network shall have UConn Health-approved virus protection software installed with current virus definitions. Virus protection shall be installed and activated on all UConn Health IT resources. Additional mechanisms shall be implemented to further protect UConn Health IT resources from malicious software whenever deemed necessary by the risk analysis or evaluation in accordance with the UConn Health HIPAA Security Risk Management, Evaluation, and Audit Policy
4. All computer equipment connected to the UConn Health network shall be up to date with the manufacturer’s operating systems security software patches.

- 5. UConn Health workforce suspecting a malicious software infection will immediately refer to the Sanctions for Breaches Policy which addresses reporting requirements.
