

Weill Cornell Medicine

POSTDOCTORAL ASSOCIATE POSITIONS in Prostate Cancer research

Several fully funded postdoctoral positions are available in the laboratory of **Maria T. Diaz-Meco** to identify cell signaling pathways that impact metabolism and inflammation in prostate cancer. Special focus on resistance to therapy and the crosstalk with the tumor microenvironment and the role of epigenetic and metabolic reprogramming in lineage plasticity. The project is based on our recent publications on this topic: *Valencia et al.* 2014, **Cancer Cell** 26, 121-135; *Linares et al.*, 2017, **Cell Metabolism** 26, 817-829; *Huang et al.*, 2018, **Cancer Cell** 33, 770-784; *Reina-Campos et al.*, 2019 **Cancer Cell** 35, 385-400.

The Diaz-Meco Lab is relocating to Weill Cornell Medicine and is actively recruiting collaborators. The lab is located in Manhattan, at the University of Rockefeller campus, and will be fully operative in March 2020.

Requirements: We are looking for highly motivated and enthusiastic individuals. The candidates should have extensive lab experience in molecular and cellular biology skills and with expertise in mouse models. Candidates must have a Ph.D. or M.D. degree. Interested applicants should submit a single PDF file containing CV, a brief description of research accomplishments, interests, and career goals, and contact information (e-mail address and phone number) of three references to **Dr. Maria T. Diaz-Meco** at mtd4001@med.cornell.edu.
