# Pancreatic Neuroendocrine Tumor (PNET)

- Infrequent neoplasia with an incidence of 1:100,000 in the US
  - 30% of patients present with symptomatic disease, and 70% present asymptotically
  - Growth and progression of tumor is slow
- Symptomology depends on the type of hormone produced
- Classification is based on:
  - Well-differentiated vs. poorly-differentiated on pathology report
- Tumor resection is recommended when:
  - Tumor size > 2 cm
  - No evidence of metastasis on staging scans
